

Mobolaji Adewale | Software Engineer

Dartford, Kent | +447534 480020 | bolajidgs@gmail.com | linkedin.com/in/mobolaji-adewale-76336423

Summary

Software and Data Engineering student with strong problem-solving skills who is well-versed (3+ years) in industry design cycles. Developed optimised, data-driven solutions to complex projects, and seeking opportunity to solve unique, relevant problems.

Education

University of Arizona MS in Information Science – Human Centered Computing Data Analysis & Visualisation, Human Computer Interaction, Artificial Intelligence, Virtual Reality, Game Design, Game Algorithms, Data Ethics	Grade: 3.714 / 4.0 expected May 2026
University of Nottingham MSc in Information Systems and Operations Management Business Intelligence & Analytics, Data Management & Manipulation, Information System Design & Development	Grade: Distinction Dec 2023
University of Nottingham BSc (Hons) in Computer Science	Jul 2022

Skills

Languages: Java, Python, JavaScript, C, C++, C#, R, PHP
Databases & Data: SQL, Data Modelling, Data Visualisation

Web & Tools: React, Node.js, HTML, CSS, Git, Agile
Other: VR development, Game algorithms, HCI methods

Experience

Self-Research – Software Engineer JavaScript, Node.js, React.js, Git, Three.js, CI/CD ▪ Crafted portfolio website by leveraging Three.js (~1.0s 3D asset load), consolidating insights from <u>three</u> self-research projects	Remote Jul 2025
Abantu Care – Software Engineer JavaScript, PSQL, Node.js, React.js, Git, Python, TypeScript ▪ Built and maintained a cloud-hosted (AWS) full-stack care system with Node.js, SQL, which increased recorded notes by <u>20%+</u> ▪ Optimised frontend, backend and database interaction: reducing code quantity by <u>15%</u> ; also utilised Python for automations	London Jun 2025
REGIME – Front-End Web Developer HTML, CSS, JavaScript, Shopify ▪ Served as sole UI/UX designer for REGIME, an independent clothing brand, earning positive reviews from <u>10+</u> respondents	Remote Apr 2025
Abantu Care – It & Administration Python, Java ▪ Automated common secretarial tasks via Python, increasing productivity of management by <u>13%</u> ▪ Developed data-driven strategy for business documentation, enabling <u>100%</u> streamlining of administrative processes	London Jun 2024
Genesys Management Consultancy – Information Systems Engineer Ruby, Java ▪ Collaborated in development of tailored information system for mobile store-front / e-learning application ▪ Researched the Ruby language to produce high quality architectural improvements and technical documentation	Remote Dec 2024
JCD (Just Concept Designs) – Front-End Web Developer HTML, CSS, JavaScript, Shopify ▪ Designed, solely, UI/UX for start-up brand's online store-front, contributing to a successful launch with <u>100% stock</u> sold online	Remote Dec 2023
IntelligentPlant – Front-End Web Developer JavaScript, Python, Git ▪ Collated and hosted an app to display / extrapolate (machine learning) real-time gas-flaring emissions with less than <u>3s</u> latency	Nottingham Nov 2021

Research

University of Arizona, School of Information <i>Individual Project: Virtual Reality's application in the gaming sphere</i> ▪ Developed standardised & gamified immersion investigation (Unity): surveyed <u>100%</u> perceived immersion during play <i>Individual Project: Can a rational agent pick the perfect football play?</i> ▪ Utilised Constraint Propagation (Python) to investigate Artificial Intelligence's usefulness within American Football play-calling ▪ Surmised statistically that <i>forward tracking</i> is <u>~74%</u> faster and <u>~71%</u> more accurate than <i>simplified AC3</i> and <i>MAC</i> , for use case	2024
University of Nottingham, Business School <i>Master's Thesis: A case study assessing the impact of website design methodology on Information System learnability</i> ▪ Statistically analysed quantitative / qualitative datasets to prove a <u>17%</u> knowledge retention increase: given better site design <i>Group Research: Applying the CRISP-DM methodology to university applications</i> ▪ Curated collaborative report on degree applicant's acceptance rates; predicted enrolments statistically with <u>~93.99%</u> accuracy <i>Group Research: Reporting on the factors affecting Information System usability</i> ▪ Led team to construct e-commerce information system: database and storefront via HTML, CSS, PHP, AJAX and JavaScript	2023
University of Nottingham, School of Computer Science <i>Individual Project: Utilising acquired knowledge of Ludology to craft a prototype 'game'</i> ▪ Programmed Object-Oriented platformer; using the Unity programming environment with C#, applying Agile methodologies	2022

Leadership

University of Arizona Campus Recreation - Intramural Sports Official

Tucson | Nov 2024

- Conducted sports officiating for intramural outdoor soccer league

Black Sports Collective - Ambassador

Nottingham | Dec 2023

- Represented the Black Sports Collective within University of Nottingham's sport
- Spoke on behalf of collective at public forum and panel on diversity and inclusion within British sport

Great British National Team American Football - Member

Nov 2021 – Dec 2023

- Three-time Great British Adult National Team member

University of Nottingham American Football – Member & Captain

Sep 2019 – Dec 2023

- Captain and Publicity Secretary
- Top-Three All-Time WR: University of Nottingham American Football

NFLUK: Flag in Schools - Representative

Nov 2022 – Jun 2023

- Mentored and organised 10-12 year old school children via competitive flag football

Other

Activities: American Football, Poetry, Music, Film Photography

Portfolio: <https://bolajiadewal3.github.io/Celestaris/>

Languages: English (Native), French (Beginner)

REGIME: Self-owned clothing brand
